OECD PaRIS

Patient-reported Indicators Survey

Progress and Next Steps

EU-Bridge Health Meeting 22 September 2017 Jillian.Oderkirk@oecd.org

OECD Policy Forum and Ministerial, January 2017

Strategic direction ---People-centred health services

✓ modernise delivery ✓ build knowledge & capacity

→ systematise patientreported measurement

Ministers

- Recommended the development of internationally comparable PROMs and PREMS
- Called on the OECD to lead this effort

www.oecd.org/health/ministerial/

~ -

PROMs covering elective surgery, cancer care, mental health – specific diseases/conditions

Diverse **instruments** and collection **methods** (paper, electronic, telephone...) in use

System-wide implementation is rare

Impetus predominantly **ground-up** (clinician-led) - principal uses at **clinical level**

Lack of PROMs for the fastest growing area of health care need (and spending): <u>primary care for complex, chronic diseases and disability</u>.

indicators in a comparable way

Breast Cancer and **hip and knee OA** recommended by Health Care Quality Indicators (HCQI) Expert Group at their meeting May 2017 Establish two small, time-limited panels of country experts to consider the most appropriate PROMs and PREMs in more detail including

- Data availability and clinical and systems use of data
- Potential for mapping among question sets in use
- Feasibility of piloting international benchmarking
 Potentially begin data collection in pilot countries in 2018-19

Collaboration with ICHOM

- Strong clinical representation in 'standard sets' development
- Robust methodology, validation and risk adjustment

Health professional input within the panels of experts

New Survey - Indicators for complex patients/multiple long-term conditions

- First international survey of health care outcomes and experiences of patients with multiple long-term conditions/complex patients
- Focus on Patients in Primary Health Care:
 - Coverage of patients with multiple long-term conditions in a range of health states
 - Relate characteristics of primary health care services to the outcomes and experiences of patients
 - New insights regarding the orientation of PHC services for optimal health.

1) Propose a **survey design** including:

- Sampling strategy
- Survey content themes and questions
- Data collection strategy

2) Develop a multi-year plan of key activities including:

- Translation
- Content testing
- Sampling frames and selection
- Questionnaire design/CAI
- Field operations
- Data processing and weighting
- 3) Describe the **anticipated costs**:
 - Costs associated with contracted services
 - National survey implementation costs

December 2017

- Interim Report submitted to the HC
 - Initial recommendations re: survey content and design

<u>May 2018</u>

- Full proposal for the implementation of the survey submitted to the Health Committee
- Describes the steps and timeline for pilots and the full survey
